InvisiGlove

Invisible Skin Protector Acts Like a Glove While Letting Skin Breathe

Description: InvisiGlove, Invisible Skin protector, shields hands form irritation caused by contact with acids, epoxies, fiberglass and other water and oil soluble chemicals. Protected hands can then be washed clean easily. InvisiGlove contains lanolin, which moisturizes and allows skin to breathe, while forming a highly protective barrier that is not removed by water alone.

Benefits:

- ❑ InvisiGlove is excellent when working with small parts when gloves may be burdensome.
- ❑ InvisiGlove forms a highly protective barrier between skin and dirt, oil, grease, solvent, paints, resins, tar, ink and shop grime.
- ❑ Protected hands can be washed clean and easily.

Directions:

- Prior to use, if hands are dirty, clean hands with Waterless Hand Cleaner.
- Spray a generous amount on hands, rub hands together, working foam into pores and around fingernails.
- To remove, use soap and water. If water is unavailable, use Waterless Hand Cleaner.
